

# 620 STANDARD

# FAAC

for beams up to 5 m

■ New pocket

■ Self-supporting barrier body

■ 624 BLD Control unit

## ■ The ideal solution for heavy traffic

The Standard 620 for barriers of up to 5 m is suitable for heavy but not continuous traffic. The barrier is supplied with a wide range of accessories, including a skirt to prevent unwanted break-ins.

## ■ Totally flexible

The FAAC 620 range is equipped with electronic deceleration at opening and closing. A version with articulated beam for low ceilings is available on request.

## ■ Long term reliability

Use of cutting-edge materials and treatments such as cataphoresis and niplon, plus tried-and-tested FAAC hydraulic technology, all combine to ensure long-life.

## ■ Leading-edge technology

SMT microprocessor electronic technology is supplied standard to ensure exceptional performance. By means of an optional card, the barrier can also control auxiliary services and an additional opposing beam. Barrier statuses can be signalled to traffic control devices.

## ■ Electronic intelligence

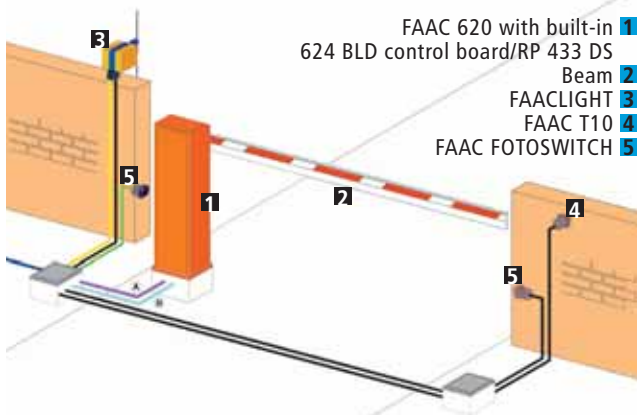

The electronic intelligence of the 620 range functions by means of three differentiated logics: automatic, semi-automatic and parking (P) - the latter was expressly designed for automatic parking systems.
